

PARAJET PILOT: BEAR GRUBS
 Thanks to Parajet's meticulous attention to detail, unwavering dedication and sheer hard work, we managed to fly a powered Parajet paramotor to above the height of Mt Everest, despite the fact that so many 'experts' told us we were mad! Parajet made this 'impossible' happen. I only want all other companies had such innovation and good service.
 We chose Parajet for three simple reasons: reliability, efficiency and power to weight ratio. Not to mention that they look very cool! But, ultimately, when your life depends on an engine, only the best will do. Bear Grubs

Client: Parajet
 Projects: Brochure design, copywriting and printing, studio photography and website.
